

INTRODUCTION

In the Financial arena, there are lot of avenues for basic, advanced & digital transactions. The present interest for any, across different geographies is CRYPTO. It appears as VERY tiny as of now, but in realty the quantum is huge. We strongly URGE that pure crypto exchanges will be much more bigger than all other exchanges in the near future. CRYPTO ultimately will play an ever more important role in world finance and we are setting an important new paradigm called XDCnetwork, A secure Token.

With all your support and networking skills the XDC will build a world-class crypto exchange, powering the future of crypto.

XDC's parents team have been in both the Media and Networking industry for many years. The team has worked on and operated a number of cross geographies, and have accumulated a large network of partners in this space. These partners will be key in bootstrapping the XDC exchange.

In additional to the technology stack, XDC is built with service in mind. XDC shares support responsibilities across the entire staff and company. When a trader has a problem, they get an answer directly from someone who knows the system and not someone reading from a script.

Block chains have no borders. Most exchanges focus only on one language or one country. Our teams have extensive working experience across Indian sub continent. And we are able to smoothly support the entire market.

XDC Exchange

Our matching engine is capable of sustaining 1,400,000 orders / second, making XDC one of the fastest exchanges in the market today. You can be certain, on our exchange, that your orders will never be stuck due to the matching engine being overwhelmed.

Feature Rollout

We will roll out the platform in the following order:

- Airdrop
- Spot trading
- Margin trading
- Futures
- Anonymous instant exchange
- Decentralized (on-chain) exchange
- And more...

XDC will support trading pairs across different platforms

Device Coverage

We will provide cross-platform trading clients for:

- Web-based trading client
- Android native client
- PC (Windows) native client
- REST API

COINS

XDC Coin

We will issue our token coin, called the XDC Coin. A strict limit of 100 Million is created, never to be increased. XDC Coin will run natively on the TRON block chain with ERC 20.

Value & Repurchasing Plan

Repurchasing plan

Every year, we will use 20% of our profits to buy back XDC TOKEN and reserve them for future equity, until we buy 50% of all the XDC TOKEN back. All buy-back transactions will be announced on the block chain. We eventually will create secure environment for XDC NETWORK.

Decentralized Exchange

In the future, XDC will build a decentralized exchange, where XDC TOKEN will be used as one of the key base assets.

XDC TOKEN Vesting Plan for the Team

Initial release: 10%

After 1 year: 10%

After 2 year: 10%

After 3 year: 10%

After 4 year: 10%

Funds Usage

- 35% of the funds will be used to build the XDC platform and perform upgrades to the system, which includes team recruiting, training, and the development budget.
- 20% will be used for XDC branding and marketing, including continuous promotion and education of XDC and block chain innovations in industry mediums. A sufficient budget for various advertisement activities, to help XDC become popular among investors, and to attract active users to the platform.
- 20% will be used for Sales & Purchases of assets and Equity development
- 25% will be kept in reserve to cope with any emergency or unexpected situation that might come up.

Team

An unyielding team led by Anil Sethi, and Babu A Naresh., Both comprises of very traditional & Advanced THINK TANK professionals. Our team has a track record of successful start-ups across many diversified verticals.
